GENERAL PURPOSE CONTROLLER

CONTROLLER FEATURES:

1. Operates on +18-36VDC.
2. 8 Digital Inputs (typically +24VDC) and 8 Relay Outputs (contact rating about 7A at 250VAC).
3. 16X2 Alphanumeric display, for process indications.
4. Configurable for simple process applications like Hydraulic press control, Burner Sequence Controllers, Dryer applications for pharmaceutical industries, Controlling motor directions etc.
5. External RS485 communication possible for interfacing with field I/O modules and VFDs.
6. COST EFFECTIVE SOLUTION COMPARED TO CONVENTIONAL PLC FOR SIMPLE APPLICATIONS
